

**FEDERAL GOVERNMENT**

**SOLUTIONS**

**BENEFITS**

- Data with different formats are easily incorporated into an integrated system to support cross-program evaluation, analysis, and reporting
- Robust, clinically based analytics include episodes of care, clinical data, severity adjustment methodologies, predictive modeling, and practice guidelines
- Detailed applications speed the time-to-answer for complex questions, and extensive catalog of templates and drag and drop report designs enable easy access to information when you need it
- Web-based, easy-to-access management reports allow users to slice and dice information in order to understand cost, quality, and access issues

**FEATURES**

- A single interface
- Clinically based analytics
- Analytically ready database
- Executive-level and detailed ad-hoc analytic reporting

## Advantage Suite Delivers Powerful Data to Drive Quality and Control Costs

In the complex and ever-changing healthcare industry, federal government healthcare programs are held to a high level of accountability by elected officials and taxpayers. Issues faced by these programs include:

- Balancing the needs to contain costs, improve quality of care, and expand access to care
- Identification of reasons for increases in cost and utilization
- Loss of millions of dollars through proliferating fraud and abuse schemes
- Complex and time-intensive reporting for routine and ad hoc requests
- Compliance with regulations and reporting requirements

Agencies that can quickly access and analyze their program’s healthcare data are better positioned to address these challenges and provide high quality care to beneficiaries.

### The Leader in Healthcare Decision Support for the Federal Government

Truven Health Advantage Suite® integrates information from diverse sources and systems, organizes it to support decision making, and enables easy access to information in a flexible, customized application. Our system provides the management tools and insight to improve the efficiency and performance of federal government healthcare programs.

**Truven Health Decision Support Solutions**

Truven Health Decision Support Solutions support the business process areas critical to effectively managing the healthcare enterprise.

### A Single-Source Solution

Advantage Suite supports core disciplines through a single database and one set of analytic applications. There are no out-of-sync data conditions, and report specialists use the same set of analytic capabilities across all report types.

Capabilities include:

- Financial reporting for budget development, cash flow analysis, and rate-setting
- Management reporting that includes dashboard measures of program performance
- Medical policy that includes advanced clinical analysis and external benchmarks
- Managed care monitoring that fully integrates claims and encounter data.
- Provider profiling that uses widely accepted methods for case-mix adjustment
- Recipient profiling, demographics, cost-sharing, and population trend analysis
- Quality assurance and quality improvement
- Disease management evaluation and monitoring that includes predictive modeling
- Program integrity that includes fraud and abuse detection and investigation

The same reporting tools and applications are available to every user in the agency, yet all users have capabilities suited to their task
