

FACT: From the start,
Truven Health has been
a leader specializing in
clinical quality measures
and quality reporting
for core measures with
100 percent on-time
submission to Joint
Commission, and 99
percent acceptance
by CMS.

CareDiscovery Quality Measures

With new Meaningful Use quality requirements and healthcare reform changes pending, now is the time to choose a reliable core measures reporting solution that offers concurrent insights, custom exports, and actionable information. Truven Health CareDiscovery® Quality Measures is the best-in-class regulatory reporting solution. As one of the nation's largest core measures vendors, CareDiscovery Quality Measures supports your quality improvement initiatives. CareDiscovery Quality Measures facilitates efficient and reliable reporting, helping to ensure performance-based reimbursement and protect your market share.

Flexible and Reliable Reporting

CareDiscovery Quality Measures gives you a timely snapshot of performance on individual measures, down to the patient and physician level. It streamlines your team's workflow by allowing you to customize your abstraction worklist according to measure set, discharge data, or completion status. Near-time uploads allow you to upload data at any time.

The Concurrent Abstraction Module for Quality Measures enables you to abstract and manage cases while patients are still in-house and care is still actively being delivered. Being able to impact care prior to patient discharge gives your providers the opportunity to improve quality and outcomes — as well as increase patient satisfaction. Management of care is streamlined by documenting clinical information from medical records and analyzing the care currently being provided. This generates more timely feedback and reporting to qualityoversight committees, physicians, and nursing staff, which leads to process improvement throughout the facility as care happens. With Concurrent Abstraction Focus Comparison and Focus Detail Reports, you can generate reports by individual physician or nursing unit to provide an overview of performance on each core measure. The ability to drill down to caselevel detail and benchmarking is also available with these reports.

BENEFITS

- Pinpoint and address quality-ofcare issues and data-collection problems before data are submitted
- Streamline workflow by allowing customized abstraction worklists
- Optional module lets you abstract and manage core measures while the patient is hospitalized
- Ensure performance-based reimbursement and protect market share
- Move quality forward with continuous access to results and benchmarking data
- Integrate with leading pay-forperformance and quality programs

FEATURES

- Best-in-class regulatory reporting solution
- 100-percent on-time submission to Joint Commission; 99 percent acceptance by CMS
- Patient- and physician-level snapshot of performance on individual measures
- Near-time uploads for frequent data postings
- Time-saving skip logic
- Award-winning product support and training
- Concurrent reporting on core measure failures while patient is still hospitalized

As an added convenience, Concurrent Abstraction makes follow-up issues on all cases easier to track and manage through a note-posting feature and a Follow-Up icon. Add additional efficiency to your concurrent abstraction process by connecting your hospital information system (HIS) using Expedite for Concurrent Abstraction. As an add-on feature to Concurrent Abstraction in CareDiscovery Quality Measures using an HL7 data feed, Expedite equips abstractors with the ability to quickly identify potential core measures cases and easily abstract them while the patient is still in the hospital. Save time and money by significantly decreasing the daily effort spent identifying and creating concurrent cases.

Save Time With Electronic Reconciliation

Concurrent Abstraction also enables reconciliation with final billed data, to eliminate double-entry of data and save much-needed time. Once your final billed data are uploaded into Quality Measures, the Concurrent

Abstraction tool combines abstracted information with the final billed data, allowing the user to do a final review before submission. This simultaneous quality-check improves accuracy and saves time spent re-entering data. Efficient and reliable reporting to CMS helps you secure your performance-based reimbursement — and Quality Measures helps you to ensure that your final data complies with regulatory reporting for final submission.

Discover the Advantages

The intuitiveness of CareDiscovery
Quality Measures will bring efficiency
and accuracy to your regulatory
reporting for both National Hospital
Inpatient CareDiscovery Quality
Measures and the Hospital Outpatient
Quality Data Reporting Program.
CareDiscovery Quality Measures
offers direct editing of administrative
fields, detailed error reports, near-time
reporting, comprehensive benchmarks,
and episode-level error reporting.

The Advantages of CareDiscovery Quality Measures

Data Uploads

- Quick turnaround time for uploaded data
- Ability to upload abstracted clinical data
- Quality control process applied to uploaded data
- Ability to upload a provider roster

Data Entry -**Abstraction**

- Enhanced view includes full data-element questions for beginners and basic view (shortened version) for experienced abstractors
- Tab-through shortcut for faster data entry with allowable-value, drop-down fields
- Pop-up calendars for quick date entry
- Time-saving skip logic with links to understand skip-logic processing and the ability to over abstract
- Easy-to-use, integrated measure sets for simultaneous abstraction
- Error Highlighting and Error Logs for identification of missing or
- Error Warnings tied to CMS errors to prevent or alert you to possible rejections
- Easy auto-fill antibiotic data entry
- Customizable user-defined fields with ability to export results
- Follow-Up and Note sections available to track additional patient details
- One-click access to the national core measures manual (data element tied to each question) built right into the tool
- Additional Help links within the tool, including complete resource guides
- Categorization of measures available while abstracting

Productivity

- Measures at a Glance report promotes monitoring of overall abstraction activity
- Ability to filter, sort, and print Episode list for creating custom work lists
- Flexible sampling options built into tool
- Dashboard promotes high-level view of abstraction performance prior to submission

Reporting

- Large selection of predefined reports available as well as exports for custom-designed reports
- Composite Measures reporting reveals your hospital's overall performance within a given measure set
- User-friendly reporting by individual physician and nursing unit allows you to create individual report cards or comparison reports
- Relevant performance information in "Board Ready" report format
- Individual and System Hospital Value-Based Purchasing report for core measure data

Exports

Four export format options — Excel, TSV, CSV, HTML

Submission Assistance

- Deadline notification posted and communicated via multiple sources
- Submission calendar within tool along with frequent submission reminders
- Weekly submission to CMS feedback integrated into the tool
- Monitoring of sampling requirements
- Quarterly regulatory specification tool updates

Concurrent **Abstraction** and Expedite **Modules**

- Efficiently identify cases, jump-start data abstraction, and spend more time improving care for core measures patients while they are still in vour hospital
- Focus reporting to identify areas requiring rapid intervention and improvement
- Reconciliation with final billed data to eliminate duplicate data entry
- Interfaces with the Hospital Information System to populate real-time data for core measure cases

Process

- **Implementation** A dedicated implementation team
 - Guidance throughout the implementation process
 - Timely implementation plan based on your needs

Custom Fields

- Flexibility in collection of additional data beyond core measure data elements
- Control of guestions and allowable values
- Easily export data from the custom fields for reporting (Custom Export)
- Design custom measure sets and assign to specific core measure populations

- Custom Exports Select and order any data elements
 - Save and quickly rerun queries as needed
 - Four export options Excel, TSV, CSV, HTML
 - Flexible and easy-to-use export design
 - Advanced filter options

"CareDiscovery Quality Measures has improved the rapport between the Quality department and the medical staff. We're giving them the actionable data they wanted, and they're appreciative of it."

Rebecca Jessie

Director of Quality Improvement and Patient Safety Rockingham Memorial Hospital

Unparalleled Support and Unrivaled Results

CareDiscovery Quality Measures offers an easy-to-use product portal with quick access to product information. The 24-hour Community allows client-to-client communication, including the ability to post a question and get feedback from other members. Community members also receive product notifications from the CareDiscovery Quality Measures product management and support teams and is backed by the following support services:

- A dedicated product support team that delivers live customer service during operating hours
- Online help for accessing and abstracting data, and in creating and interpreting reports and analyses
- Online access to the latest Joint Commission and CMS requirements, definitions, and standards
- Web-based training sessions, and field and telephone support
