

More Than Electronic Reporting: A Comprehensive Quality Management Solution

Providing Everything You Need, Every Time

- ✔ Data collected from multiple, disparate EHRs
- ✔ Accurate eCQM calculations and electronic reporting to CMS and TJC
- ✔ View multiple reports, including data quality and trend reports
- ✔ Set custom benchmarks to drive performance improvement
- ✔ Stay updated with the latest regulatory changes

Meet Both Regulatory Reporting Requirements Using the Same Solution — Ours.

- 2014 Edition ONC-ACB certified EHR Module

- TJC ORYX®-Approved

The Need

The Centers for Medicare & Medicaid Services (CMS), along with The Joint Commission (TJC), now allow hospitals to electronically submit clinical quality measures (eCQM) to meet meaningful use and TJC reporting requirements.

The Solution

Meaningful Use Quality Manager (MUQM) from Truven Health Analytics™ helps you meet electronic reporting requirements for CMS and TJC — no matter which electronic health records (EHRs) you use. Plus, you get Truven Health experience and expertise as you transition from core measures to eCQM reporting over the next several years.

How it works

1. Data Content and Gap Analysis

Understand data element definitions using the MUQM Data Submission Manual and perform gap analysis. Fill in the gaps and create an input data file in standardized format.

2. Data Upload

Upload the data file using a simple and secure interface. MUQM will calculate the eCQMs and generate comprehensive error reports.

3. Analysis and Reporting

Review and analyze measures, trends, and other reports; and complete MU attestation.

4. Electronic Submission

Generate and submit files to CMS and TJC via approved formats and processes.

Leverage the Unmistakable Truven Health Advantage

Electronic submission of eCQMs is a new and complex process with challenges and uncertainties. By choosing Truven Health, you'll have a partner skilled not in just reporting measures, but also in ensuring their quality.

Benefit for Our Core Measure Solution Users

Compare and analyze eCQM outcomes with core measure outcomes in a single location.

Market leader
in **CMS and TJC quality reporting requirements** since inception

A **core measure and MU measure solution** —
for all your quality reporting needs

Industry-wide,
recognized track record of **data collection, reporting, and comprehensive client services**

This certified product version requires no additional costs to clients beyond the annual license fee, which is valid for the term of the contract and includes the use of the solution and ongoing support services. Changes made following implementation, including changes in the number of measures being reported (beyond the agreed upon number), the number of users (beyond the agreed upon number), or changes in the client's EMR may incur additional fees. The solution has no other known contractual, technical, or practical limitations related to a particular certified capability.
