Better Patient Outcomes From the Industry Standard for Patient Education

Micromedex® Patient Education, featuring CareNotes®, delivers a single source of evidence-based patient education materials across the continuum of care; including pre-care, inpatient, discharge, emergency department, and consumer health education. All content comes from the same editorial group so there are no gaps or contradictions.

With specific information at every stage of care: patients understand what is involved in their treatment and become informed participants in the process. When protocols are followed, the result is greater safety, better outcomes, and more cost-effective treatment.

Nurses, pharmacists, and physicians benefit from the ability to quickly access patient education information directly within their workflow.

Providing over 8,000 evidence-based documents covering more than 2,200 medications and nearly 50 medical specialties, CareNotes provides easy-to-understand information for the patient. CareNotes makes more effective use of the clinician’s time, while improving the patient experience, helping to meet core measure requirements, and reducing readmissions.

TRUVENT FACT: Consumer Lab Education helps patients understand almost 500 frequently performed tests, including descriptions, risks, how they will feel and results interpretation. Lab Education is highly valuable in a patient portal.
Meet Necessary Compliance Objectives

CareNotes helps hospitals meet all requirements for standard and specific patient education. It is HL7 compliant and utilizes the interface to stream information directly into the clinician’s workflow. It also leaves an electronic audit trail to prove that all documents were given to the patient. Finally, CareNotes helps achieve the U.S. patient experience criteria for HCAHPS (Hospital Consumer Assessment of Healthcare Providers and Systems), Value-Based Purchasing, and Meaningful Use.
