

Micromedex Patient Education, featuring CareNotes

Education resources to help
enhance patient engagement

CareNotes can help you:

- Engage patients to help increase their understanding and the importance of their complying with a treatment plan
- Save time, improve workflow, and lower costs with access to an integrated, single source of materials
- Reduce knowledge gaps with relevant, consistent, evidence-based and easy-to-understand information
- Support Meaningful Use requirements, improve a patient satisfaction score and support regulatory and compliance guidelines, including Core Measures
- Enable clinicians to customize patient education to support organization policies and procedures

Quick look

more than **10,000** documents

covering **2,400** medication topics

clinical evidence on **480** lab tests

available in **15** languages

written at a **5th- to 7th-grade** reading level streamed directly into the workflow

Truven Health Analytics® was acquired by IBM in 2016 to help form a new business, Watson Health™. Watson Health aspires to improve lives and give hope by delivering innovation to address the world's most pressing health challenges through data and cognitive insights.

Comprehensive patient education

Micromedex® Patient Education, featuring CareNotes®, delivers a single source of evidence-based patient education materials across the continuum of care—including precare, inpatient, discharge, emergency department, ambulatory and wellness education.

With practical, objective information for every stage of care:

- Patients can become more knowledgeable about their treatment plan and become engaged participants in the process, which can help improve their overall experience
- Patients receive consistent education across all care settings, when and how they need it
- Nurses, pharmacists and physicians can quickly access patient education information directly within their workflow, making more effective use of their time

Research demonstrates that engaged patients are more likely to have:

- Lower healthcare costs¹
- Normal systolic blood pressure, triglyceride and HDL levels, a healthy weight, and less likely to visit the emergency room or become hospitalized²
- Have more positive care experiences³

Features

- Written in plain language for concise and easy-to-read documents
- All content comes from the same editorial group, so there are no gaps or inconsistencies
- Includes anatomical and action-oriented images to help with comprehension
- Available as a web-based solution, data file or via an HL7 integration option
- Can be integrated into electronic health record (EHR) vendor application

Additional options

- Extend your community reach with **Micromedex Consumer Health Education featuring SmartEngage™**. SmartEngage delivers a complete collection of online, award-winning and accredited educational content. Combining consumer health education with CareNotes can help you strengthen your brand and promote your strategic service lines.
- Add **Micromedex Pediatric Video Education** featuring award-winning, animated health education videos from **Health Nuts Media**. Combining the simplified, explanatory content of the pediatric education videos with the evidence-based, instructive content of CareNotes can provide a more complete, interactive and effective patient education experience.
- Get **Medication Essential Fact Sheets**. Improve patient satisfaction to help increase HCAHPS scores—with consistent and concise, easy-to-ready medication education handouts—designed to reinforce medication adherence and compliance.

Statement of Good Security Practices: IT system security involves protecting systems and information through prevention, detection and response to improper access from within and outside your enterprise. Improper access can result in information being altered, destroyed, misappropriated or misused or can result in damage to or misuse of your systems, including for use in attacks on others. No IT system or product should be considered completely secure and no single product, service or security measure can be completely effective in preventing improper use or access. IBM systems, products and services are designed to be part of a lawful, comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products or services to be most effective. IBM does not warrant that any systems, product or services are immune from, or will make your enterprise immune from, the malicious or illegal conduct of any party.
