- Population Health Management
- Plan and Provider Profiling
- Program Integrity
- Quality Improvement

## Balance Healthcare Cost and Quality Under Fiscal Constraints

Use our trusted benchmarks and consulting to help identify program redesign and improvement opportunities. Truven Health Analytics<sup>SM</sup> has proven consulting resources and experience to help government agencies balance the cost and quality of healthcare within the constraints of the fiscal environment. You benefit from our experience with more than 25 states and multiple federal agencies because it enables us to provide unique insights for addressing specific program needs. Agencies can better identify opportunities for program redesign and improvement using our benchmarks, while trusting that our proven clinical and analytic methods ensure the information is reliable.

Truven Health delivers a combination of flexible and powerful analytics with embedded methods that enable fast retrieval of data. Our consulting studies are independent of Medicaid Management Information System staff, ensuring a rigorous and impartial review of program performance.

### The Benefits

Our consulting services, coupled with Truven Health information solutions, help government agencies make sound decisions relative to the cost and quality of their healthcare programs. Our solutions deliver advanced analysis in the following six areas:

- **Cost Containment** – Truven Health helps you improve not only the quality and accessibility of your healthcare services, but also their efficiency. In fact, Medicaid agencies that rely on our cost-containment analyses have saved hundreds of millions of dollars.
- **Budgeting** – You can provide solid projections of fiscal and program impact to support your budget policy using our information solutions. Our staff can help develop customized cost driver analyses and “what if” scenarios, easily modeling the effects of pharmaceutical, health services, and eligibility policy changes.
- **Managing Population Health** – Tailor interventions to improve your beneficiaries’ compliance and health outcomes with our custom

solutions. Our predictive modeling and episode-based clinical measures enable agencies to more accurately measure, predict, and manage risk. Comparative standards and best-in-class benchmarking help you identify and focus interventions to maximize your program results.

- **Plan and Provider Profiling** – By monitoring practice patterns with risk- and severity-adjusted measures, we can help you improve your performance. We can facilitate successful partnerships to improve patient care that reduce overall costs.
- **Program Integrity** – Truven Health delivers sophisticated program integrity and SUR solutions to help you identify areas of potential fraud, abuse, or overpayment — including the first claims editing system to offer both payment policy edits and medical management edits in a single application.
- **Quality Improvement** – Accurately assess quality and appropriateness of care for your beneficiary population using our process for Healthcare Effectiveness Data and Information Set (HEDIS) audits, encounter data validation, and integration of administrative data with survey and medical record data.

While quality databases and software are critical, so is analytic expertise. Our professionals are the best in the industry; they are relentlessly committed to helping our customers achieve significant results. Their depth of expertise spans multiple disciplines including clinical practice, information sciences, and quantitative analysis. In fact, our customers consistently tell us that the quality of our people is their number one reason for selecting Truven Health.

With more than 30 years of industry experience, Truven Health has an intimate and unmatched understanding of healthcare information. Our success in helping Medicaid agencies effectively manage their programs is in part attributable to our unique experience in all facets of healthcare. In addition to our work with more than 25 states, we have long-term relationships with the Centers for Medicare & Medicaid Services (CMS), Agency for Healthcare Research and Quality (AHRQ), Centers for Disease Control and Prevention (CDC), Substance Abuse and Mental Health Services Administration (SAMSHA), and other federal agencies.
