ESTIMATES

Profiling the Future Medicaid Eligible Population as a Result of Healthcare Reform

Preparing for the coverage expansion resulting from healthcare reform can be a daunting task without accurate estimates. Truven Health AnalyticsSM has developed detailed eligibility and enrollment estimates for Health Insurance Exchanges as well as state Medicaid programs that support a number of areas of health care reform planning and development efforts. These eligibility and enrollment estimates include detailed demographic information, including age and gender distributions, geographic location, family income (i.e., percentage of federal poverty level), and relative health status of potential enrollees.

Eligibility and enrollment estimates that include detailed demographic information can be used to support a number of tasks, including, but not limited to, outreach and marketing campaigns, the Exchange navigators program, customer service and call center capacity and operations, solicitation of qualified health plans, and the financial sustainability plan for the Exchange.

Detailed Estimates and Reporting

Truven Health uses proprietary Insurance Coverage Estimates (ICE) to provide our clients with multi-year estimates of the total number of people covered by seven different types of insurance by ZIP code, age group and gender.

To construct local, annual estimates, Truven Health uses multiple sources of insurance coverage data and various models. The estimates forecast the impact of the Patient Protection and Affordable Care Act (ACA) on health insurance coverage. The insurance categories include:

- Medicaid
- Medicare
- Dual Eligibles (i.e., Medicare and Medicaid)
- Employer Sponsored Insurance
- Exchange (Non-Group)
- Non-Exchange (Non-Group)
- Uninsured

In addition, Truven Health performs custom reporting which can include the following:

For the Medicaid program:

- Currently eligible for Medicaid, but not enrolled
- People who will become eligible under the Medicaid expansion that will take effect in 2014.

For the Children’s Health Insurance Program (CHIP):

- Children currently eligible for CHIP, but not enrolled
- Children eligible for the CHIP in 2014

For the Exchange:

- People who will become eligible for subsidized coverage through the individual market Exchange, broken down by federal poverty level and family status.

We also provide estimates of health status and profile tabulations for each group listed above. These estimates include:

- National tabulations of health status, behaviors and chronic conditions based on the 2010 National Health Interview Survey
- Connecticut tabulations of health status, and behaviors based on the Behavioral Risk Factor Surveillance Survey (likely 2008–2010) for uninsured adults.

Sample Report

Year	Medicaid	Medicare	Medicare Dual Eligible	Private-Direct	Private-ESI	Private-Exchange	Uninsured
2010	189,058	111,458	20,811	59,487	501,442	0	405,365
2011	181,402	113,853	20,911	56,947	515,345	0	407,475
2012	177,994	116,486	21,078	54,600	524,484	0	410,432
2013	171,321	120,317	21,778	56,640	530,940	0	414,067
2014	267,416	124,820	22,742	54,324	541,207	57,379	258,039
2015	292,709	129,112	23,524	53,143	546,805	80,783	211,605
2016	300,404	132,450	23,956	45,950	527,889	134,482	181,600
2017	291,007	135,965	24,420	46,020	527,770	148,073	183,076
2018	291,096	140,239	25,198	48,383	529,190	146,951	185,453
2019	290,564	144,092	25,712	48,496	529,459	152,975	185,995
2020	290,834	148,217	26,297	48,919	531,332	151,752	191,356

Sample baseline report showing projected shifts in the uninsured population to the Medicaid and other private payer categories beginning in 2014. Report dimensions available also include ZIP code, age group, and gender.
