- Part of the Truven Health Payment Integrity Enterprise™ solution

Support Informed Healthcare Decisions With Advantage Suite

In the wake of landmark healthcare reform legislation, Medicaid and other state healthcare programs are faced with a daunting set of challenges. They must contain spiraling costs, improve quality of care, and increase healthcare access to needy populations — all while being held to a high level of accountability by taxpayers and elected officials.

Truven Health Advantage Suite® helps state healthcare agencies quickly access and analyze their programs' healthcare data to address these challenges and provide high-quality care to beneficiaries.

Issues Advantage Suite helps state healthcare agencies tackle:

- Pressure to contain escalating costs
- Compliance with state and federal regulations and reporting requirements
- Loss of millions of dollars through proliferating fraud and abuse schemes
- Complex and time-intensive reporting for routine and ad hoc requests
- Identification of reasons for cost and utilization changes
- Balancing the needs of containing costs, improving quality of care, and expanding access to care

Solutions for State Government

Advantage Suite supports the business process areas critical to managing the healthcare enterprise:

Beneficiary Management
Provider Management
Program Management
Operations Management
Program Integrity Management
Managed Care Management
Care Management

Comprehensive Tools for Healthcare Decision Support

Truven Health Advantage Suite integrates information from diverse sources and systems, organizes it to support decision-making, and enables easy access to information in a flexible, customized application. Our system is a certified SURS and MARS solution in many states, and provides the management tools and insight to help states improve the efficiency and performance of healthcare programs.

A Single-Source Solution

Advantage Suite supports core healthcare program disciplines through a single database and one set of analytic applications. Decision Support System (DSS), SURS, and MARS information is updated at the same time, in one unified process.

Advantage Suite capabilities include:

- Financial reporting for budget development, cash flow analysis, and rate-setting
- Management reporting that includes dashboard measures of program performance
- Medical policy reporting that includes advanced clinical analysis and external benchmarks
- Managed care monitoring that integrates claims and encounter data
- Provider profiling that uses widely accepted methods for case-mix adjustment
- Recipient profiling, demographics, cost-sharing, and population trend analysis
- Quality assurance and quality improvement support
- Disease management evaluation and monitoring that includes predictive modeling
- Program integrity support that includes SURS reporting, as well as fraud and abuse detection and investigation

The Advantage Suite Single Interface

The same reporting tools and applications are available to every user in the agency, yet all users have capabilities suited to their tasks.

About Truven Health Analytics, an IBM Company

Truven Health Analytics, an IBM Company, delivers the answers that clients need to help them improve healthcare quality and access while reducing costs. We provide market-leading performance improvement solutions built on data integrity, advanced analytics, and domain expertise. For more than 40 years, our insights and solutions have been providing hospitals and clinicians, employers and health plans, state and federal government agencies, life sciences companies, and policymakers the facts they need to help them make confident decisions that directly affect the health and well-being of people and organizations in the U.S. and around the world.
